DISCOURSE – A short Introduction

1) Go on Main Page of the Discourse of the french Pirate

- 3) Then, write your email, your nickname and a password
- 4) Create the account

5) Then, this windows pop-up

C'est presque terminé! Nous avons envoyé un email d'activation à pakeman@protonmail.com. Merci de suivre les instructions pour activer votre compte.

Si vous ne le recevez pas, vérifiez le dossier Spam dans votre messagerie.

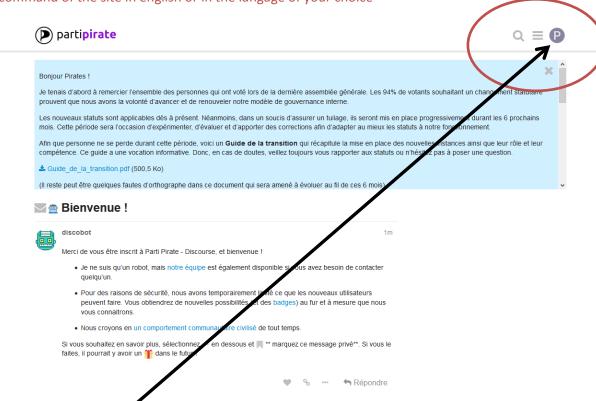

It says that you received a confirmation email and that you have to go on your email account to confirm your subscription to Discourse: just click on the link in the email you received.

Once, you click on the link in the email you received in your regular mailbox, you'll be redirected to this:

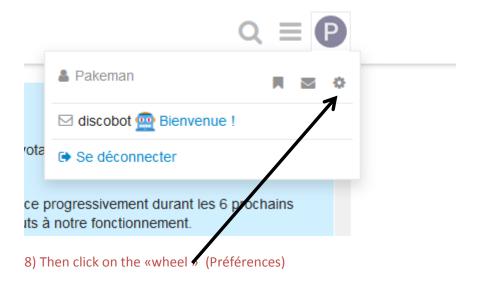

Juste click on the blue button:

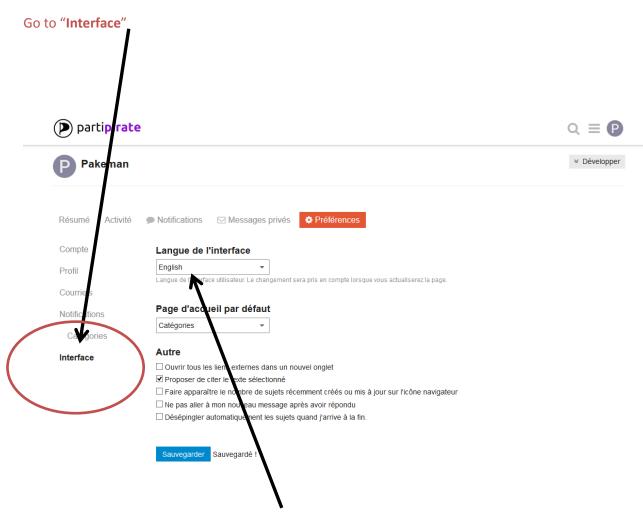

6) Now your Account is created and you have to change the setting so that you can have all the command of the site in english or in the langage of your choice

7) Click on the « Letter » (the first letter of your Nickname – so it will not necessary be a **P** for you)

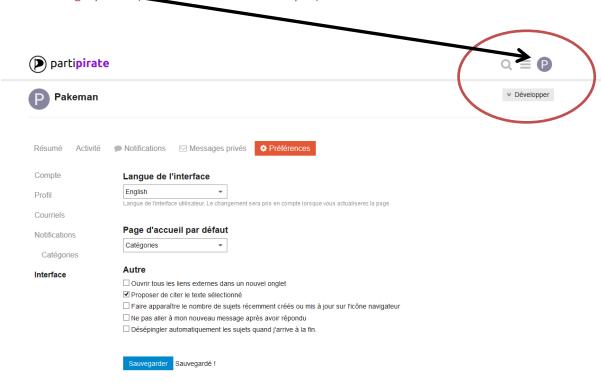

9) Then, you'lle be on this page

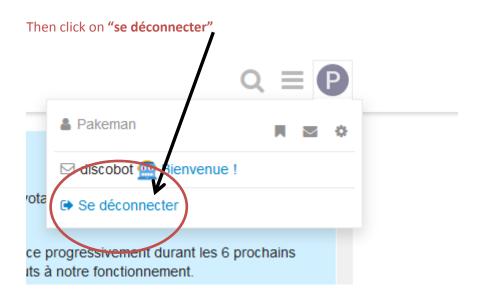

And choose « English » or an other langage that you want.

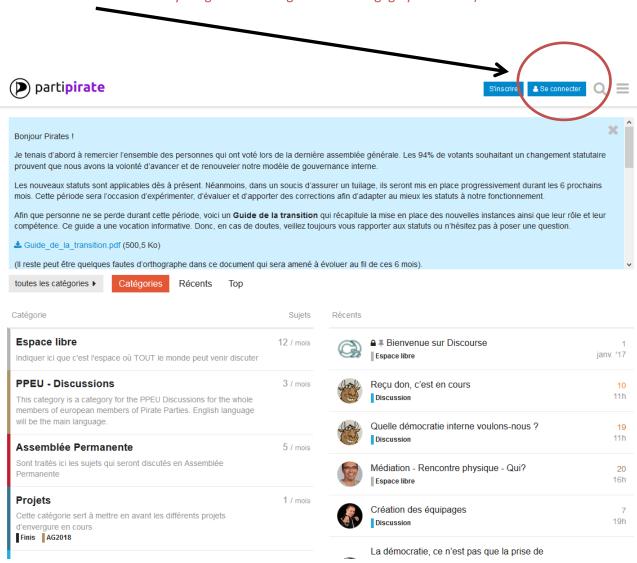

10) Then you have to disconnect and reconnect

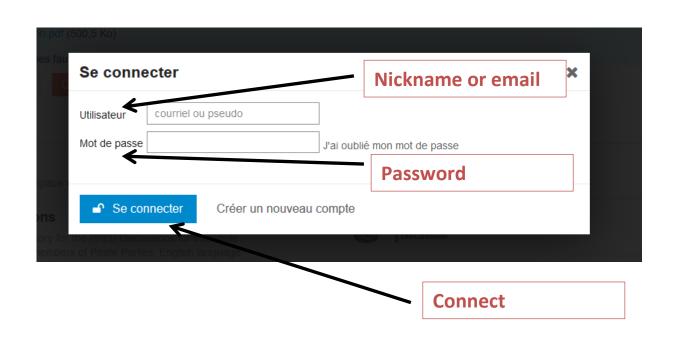

Click on the grey letter(whatever the letter is for you)

And then reconnect and everything will be in English or the langage you choose):

11) How to see a discussion and answer to it and how to mention someone

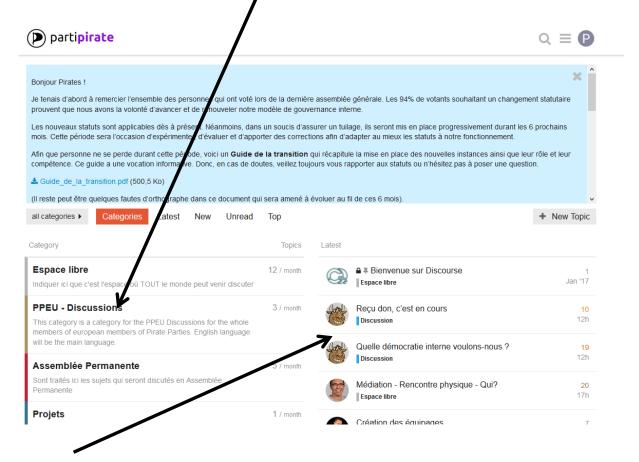

Discourse is a nice mix between a mailing-list and a classical Forum. You will receive notification from people mentioning you in your regular mailbox. You will receive Private Message in your regular Mailbox and in the Mailbox of your Discourse Account and you can answer the message from your regular Mailbox or from your internal Discourse Mailbox (both will function).

First, just some explanation on the main page

On the left, you have all the categories

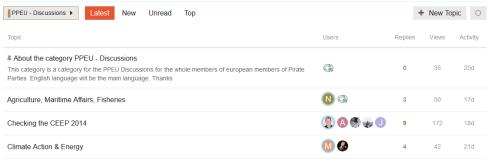

⇒ You can see all the subject of the category open to everybody : for exemple "PPEU-Discussions" is an open category

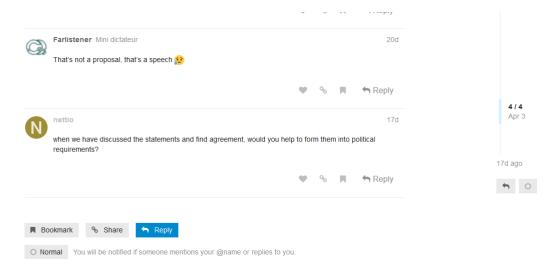

On the right, you have all the last message written on Discourse

If you click on the category "PPEU-Discussions", you will see the list of all the discussion-list:

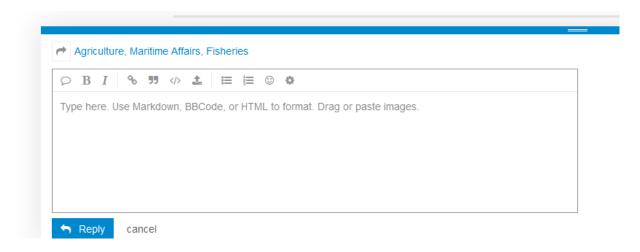

There are no more PPEU - Discussions topics. Why not create a topic?

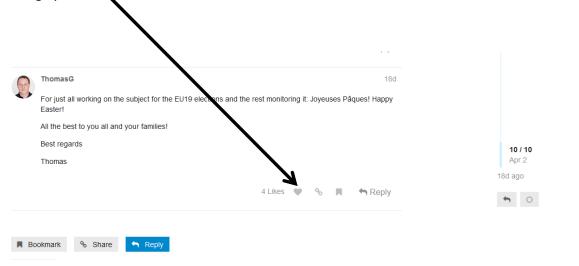

You click on a Topic, you can see the discussion and at the end of the discussion, you can reply to it (just click on the blue button "Reply")

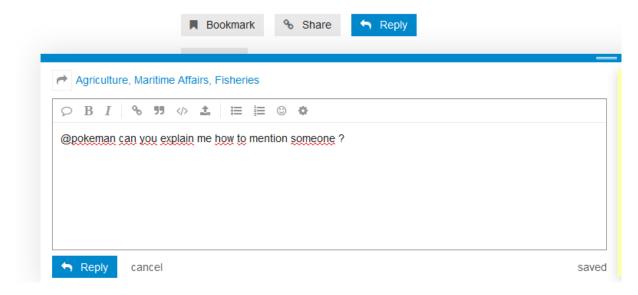

A window will open at the footer and you can write your answer in it and then send the answer by clicking on "Reply" (again)

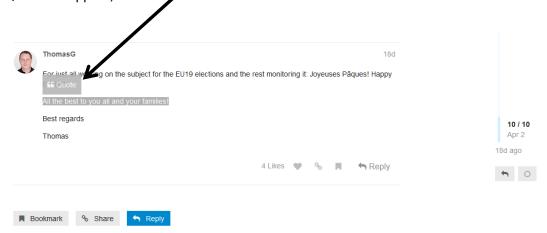

If you support a message, similar to facebook, you can like it. Just click on the heart in the bottom of the message you like:

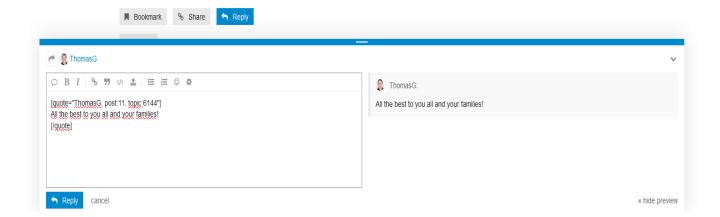

If you wan to contact someone specifically on a public message, you can just ad an @ before his nickname and she/he/it will receive a notification telling him that someone mention her/his/its nickname on a public discussion. Exemple :

If you want to Quote someone, in your response, just select the words you want to Quote, a grey "Quote will appear, click on it:

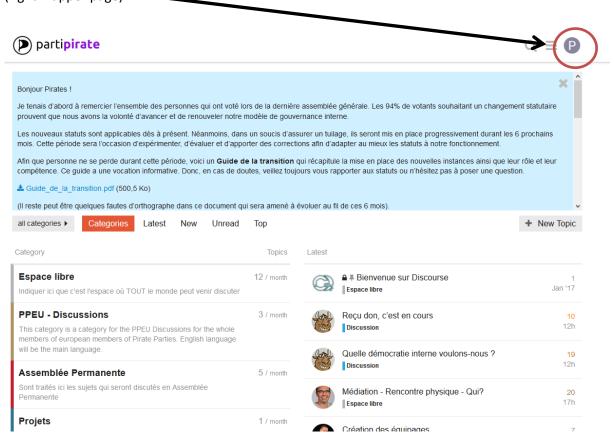

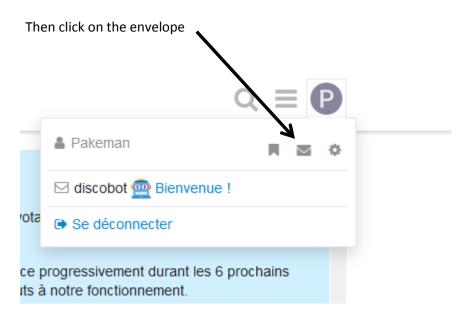

Then the answer will open and you can write your message with the quote :

11) How to send a private message (function disabled at the beginning)

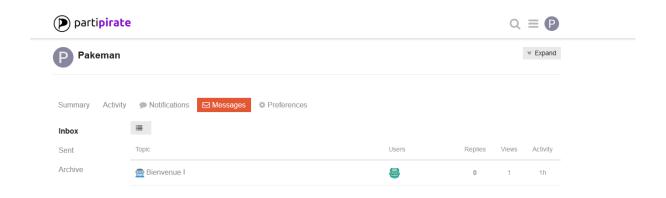

You can send and receive private message to the other user. First, click on the Letter or the Picture (right – upper page)

You will be on your private inbox and see the list of the email you received.

In the following exemple, I have only one email received from the bot of the discourse:

In the first connection, you will not be able to write private email. This function is disable but after a while, you will be allowed to make it.

You will have a blue box "Create a private message", then just write @ and then the nickname of the personne who you want to write a message_
